

# GroKhet

Growing Smarter. Harvesting Better.

Grow **More**. Spend **Less**.  
**Stress Free** Farming.

About  
**GroKhet**  
Growing Smarter. Harvesting Better.

GroKhet is an agriculture-focused brand providing practical, durable and cost-effective Protective farming products for modern farmers, nurseries, gardeners and agri businesses. Our products are designed to improve crop support, plant growth, farm hygiene and productivity while reducing maintenance and long-term cost.

### OUR VISION

To build a **smart, sustainable** India where every farmer earns fair rewards **through modern farming**.

### OUR MISSION

To deliver **affordable and effective** protective farming solutions that help farmers **protect crops and increase income**.

# Why Choose **GrōKhet**

Growing Smarter. Harvesting Better.

## One-Stop Agri Product Solution

All essential agriculture products available at one place for farmers, nurseries and agri businesses.

## Farmer-Friendly Pricing

Quality agri products at practical and competitive prices to support every farming need.

## Reliable Delivery Support

Proper order coordination and timely dispatch support for smooth product delivery.

## Long-Term Customer Relationship

We focus on trust, repeat business and continuous support beyond one-time sales.

## Marketing Support & Branding

We provide marketing materials, product creatives and promotional support customized with your firm name to help you sell better.

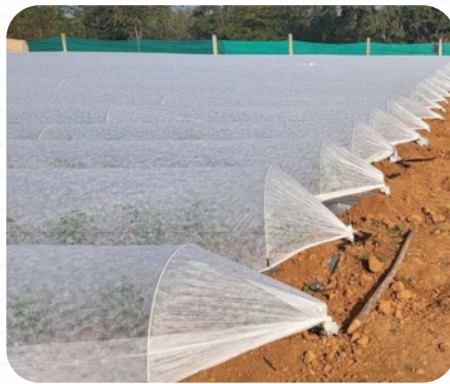

**Grow More. Spend Less.**  
**Stress Free Farming.**

with **GrōKhet**  
Growing Smarter. Harvesting Better.

# CROP COVER

GroKhet non-woven crop cover is made from polypropylene or polyester fibres that is used to protect crops from various environmental factors.

GroKhet's crop cover is tear resistant and is U.V. stabilized. It allows up to 90% of the light to reach the crops, which provides ideal day and night-time cover protection.

# CROP COVER

## Features

- Made from high-quality **non-woven polypropylene** fabric.
- **UV-stabilized** and **tear-resistant** material.
- Allows up to **90% sunlight penetration**.
- **Lightweight** and **breathable** fabric.
- **Easy installation** for tunnel farming.

## Benefits

**Protects** crops from frost, insects, wind & dust

**Reduces** crop stress caused by temperature changes

Creates a **micro-climate** for faster crop growth

**Improves** germination and plant health

## Advantages

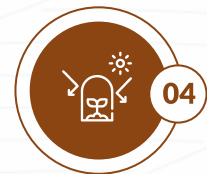

**Higher** crop yield and **better** crop quality

**Saves** farming cost and labor

**Reduces** pesticide usage

**Ideal for** modern protective farming

# FRUIT COVER

GroKhet Fruit Covers are specially designed to protect fruits from insects, pests, birds, sunburn and environmental damage.

They help prevent black spots and fruit cracking while ensuring uniform growth, color and size. Using fruit covers results in better quality produce with higher market value.

# FRUIT COVER

## Features

- Breathable protective bag material
- Available in multiple sizes for different fruits
- Lightweight and easy to install
- Durable and weather resistant

## Benefits

**Protects**  
fruits from  
pests and birds

**Prevents**  
sunburn and  
black spots

**Improves**  
fruit quality  
and finish

**Enhances**  
market value  
of produce

## Advantages

**Reduces**  
Fruit damage  
and losses

**Minimizes**  
pesticide  
usage

**Ensures**  
uniform  
fruit growth

**Cost-effective**  
fruit protection  
solution

# PLANT/TREE COVER

GroKhet Plant/Tree Covers provide effective protection to young plants from insects, pests, wind and extreme weather conditions.

They allow proper airflow and sunlight penetration while creating a favorable environment for healthy plant/tree growth.

# PLANT/TREE COVER

## Features

- Made from breathable protective fabric
- Lightweight and flexible material
- Allows air and light penetration
- UV stabilized material

## Benefits

**Protects**  
plant/tree from  
harsh weather

**Improves**  
plant **growth**  
and **yield**

**Reduces**  
**pest** and  
**insect damage**

**Lowers**  
farming **stress**  
and **input costs**

## Advantages

**Allows**  
sunlight, air, and  
moisture flow

**UV stabilized**  
and **tear**  
**resistant**

**Lightweight**  
and **easy**  
**to install**

**Cost-effective**  
plant/tree  
**protection** solution

# BUNCH COVER

GroKhet Bunch Covers are widely used for crops like banana/papaya and grapes to protect fruit bunches from insects, dust, sunburn and bird attacks.

They help maintain clean, uniform and high-quality fruit appearance, improving overall crop value.

# BUNCH COVER

## Features

- 100% Polypropylene (PP) Non-Woven Fabric
- Breathable and lightweight design
- UV stabilized material
- Easy to install and reusable

## Benefits

**Protects**  
bunches from  
**pests and birds**

**Improves**  
fruit **quality**  
and **appearance**

**Prevents**  
**sunburn** and  
**black spots**

**Increases**  
better  
**market value**

## Advantages

**Reduces**  
Fruit **damage**  
and **losses**

**Minimizes**  
**pesticide**  
use

Ensures  
**uniform**  
**fruit growth**

**Cost-effective**  
**protection**  
solution

# GRO NETLON COVER

Gro Netlon nets are durable protective nets used in agriculture to safeguard crops from birds, animals and external damage.

They are made from high-strength UV-stabilized materials and are ideal for orchards, farms and horticulture crops.

# GRO NETLON COVER

## Features

- High-strength UV-stabilized net
- Lightweight structure and easy installation
- Durable polypropylene material
- Breathable fabric

## Benefits

**Protects**  
crops from **pests**  
and **weather**

**Reduces**  
**heat and**  
**sunlight** stress

**Improves**  
crop **growth**  
and **health**

**Minimizes**  
crop **damage**  
and **losses**

## Advantages

**Reduces**  
**pesticide**  
dependency

**Supports**  
better crop  
**productivity**

**Long-lasting**  
and  
**cost-effective**

Ideal for  
**protected**  
farming use

# WEED MAT

GroKhet WeedMat is a premium-quality HDPE woven ground cover designed to effectively block weed growth while maintaining soil moisture and improving overall crop health.

It creates a clean, controlled farming environment for better productivity.

# WEED MAT

## Features

- UV Stabilized for long outdoor life
- High-strength HDPE woven fabric
- Water & air permeable design
- Tear-resistant & durable material

## Benefits

**Stops**  
weeds growth and  
saves labor cost

**Conserves**  
moisture and  
reduces water use

**Promotes**  
healthier, cleaner  
crop growth

**Increases yield** with  
**low maintenance**  
farming

## Advantages

**Cuts**  
herbicide and  
weeding expenses

**Long-lasting,**  
**reusable** and  
**cost-effective**

**Boosts**  
**productivity**  
with less effort

**Smart**  
investment for  
**higher farm profits**

# SHADE NET

GroKhet Shade Nets are made from UV-stabilized HDPE fabric designed to protect crops from excessive sunlight, heat, wind and hail.

They help create an ideal micro-climate for nurseries, polyhouses and open farming, ensuring better plant growth and productivity.

# SHADE NET

## Features

- UV stabilized HDPE material
- Available in multiple shade percentages
- Strong knitted and durable fabric
- Heat, wind and hail protection

## Benefits

**Protects** crops from **harsh sunlight** and **heat**

**Reduces** **water loss** and improves **crop health**

**Promotes** faster, healthier **plant growth**

**Increases yield** with better **growing conditions**

## Advantages

**Saves** crops from **climate damage losses**

**Lowers** **irrigation** and **maintenance costs**

**Long-lasting, high-return** farm investment

**Boosts** productivity and **farmer profits**

# AGRI THREAD

GroKhet Agri Threads are high-strength plastic threads specially developed for horticulture crops and creeper plants such as tomatoes and gourds.

They provide strong plant support and are available in various sizes for different agricultural applications.

# AGRI THREAD

## Features

- High tensile strength thread
- UV stabilized and durable
- Available in multiple sizes
- Lightweight and easy to use

## Benefits

**Provides**  
strong support  
to crops

**Improves**  
plant **growth**  
and **yield**

**Makes**  
crop management  
easier

**Reduces**  
crop **damage**  
and **losses**

## Advantages

**Long-lasting**  
and **cost-effective**  
solution

**Saves**  
labor and  
maintenance effort

**Increases**  
productivity with  
**better support**

**Smart**  
investment for  
**higher farm returns**

# CROP SUPPORT NET

GroKhet Crop Support Nets are designed to support climbing plants like cucumber, cherry tomato and other vine crops.

These lightweight and UV-stabilized nets help plants grow vertically, improving air circulation, crop quality and yield.

# CROP SUPPORT NET

## Features

- UV stabilized high-strength net
- Lightweight and easy to install
- Suitable for cucumber, tomato and creeper crops
- Durable, flexible and reusable

## Benefits

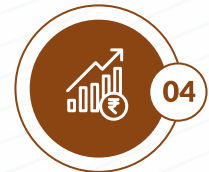

**Gives** strong support for healthy **crop growth**

**Keeps** fruits **clean, straight** and **damage-free**

**Improves** sunlight, **air flow** and **spraying coverage**

**Helps** increase **yield** and better **market quality**

## Advantages

**Saves** labor and makes **harvesting faster**

**Reduces** crop loss, **rotting** and **plant breakage**

**Long-lasting** solution with **low maintenance**

**Smart** investment for **higher farm profit**

# GRO BAGS

GroKhet LDPE Gro Bags are durable planting bags designed for nursery cultivation, terrace gardening and horticulture crops.

They provide excellent drainage, root development and portability, making them ideal for modern farming practices.

GroKhet HDPE Gro Bags are strong and reusable grow containers made from high-density polyethylene material.

They are ideal for vegetables, fruits and nursery plants, offering durability, proper aeration and efficient root growth.

# GRO BAGS

## Features

- Strong LDPE & HDPE quality material
- UV stabilized and long-lasting
- Proper drainage for healthy roots
- Available in multiple sizes

## Benefits

**Perfect** for terrace, nursery and commercial farming

**Supports** healthy root growth and better plant development

**Saves** space, water and soil management effort

**Helps grow** vegetables, fruits and flowers easily

## Advantages

**Durable,** reusable and cost-effective

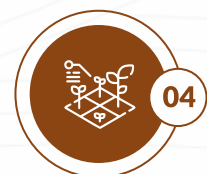

**Easy to** move, fill and maintain

**Better** crop growth with controlled planting

**Smart** solution for high-output farming in less space

# FIBER STICK

GroKhet Fiber Stick is a strong, flexible, and rust-free support stick used for crop cover tunnel making, giving safe and durable support without damaging the crop cover.

# FIBER STICK

## Features

- Strong and flexible fiber material
- Rust-free and weather-resistant
- Lightweight and easy to install
- Available in multiple sizes
- Safe for crop cover fabric
- Durable and long-lasting

## Benefits

**Gives** strong support for crop cover tunnels

**Protects** crop cover from tearing or damage

**Helps** protect crops from weather and pests

**Makes** tunnel setup faster and easier

## Advantages

**Better** alternative to iron rods

**Saves** labor and installation time

**Long-lasting** with low maintenance

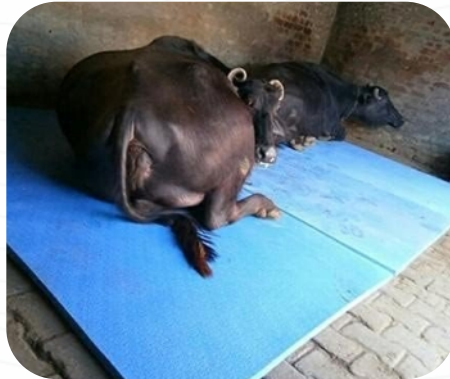

**Smart investment** for protected farming setup

# COW MAT

GroKhet Cow Mat is a comfortable, anti-slip, and hygienic flooring solution for dairy farms, designed to give cattle a soft resting surface and maintain farm cleanliness.

# COW MAT

## Features

- Anti-slip surface design
- Soft, comfortable, and durable material
- Easy to clean and maintain
- Water-resistant and long-lasting
- Better grip and cushioning
- Suitable for dairy farm flooring

## Benefits

**Provides** better **comfort** and **reduces** **cattle stress**

**Reduces** risk of **slipping, injury,** and **leg pain**

**Maintains** better **hygiene** and **cleanliness**

**Supports** better **milk productivity** through **comfort**

## Advantages

**Smart** **long-term investment** for dairy farms

**Reduces** **cleaning** and **maintenance effort**

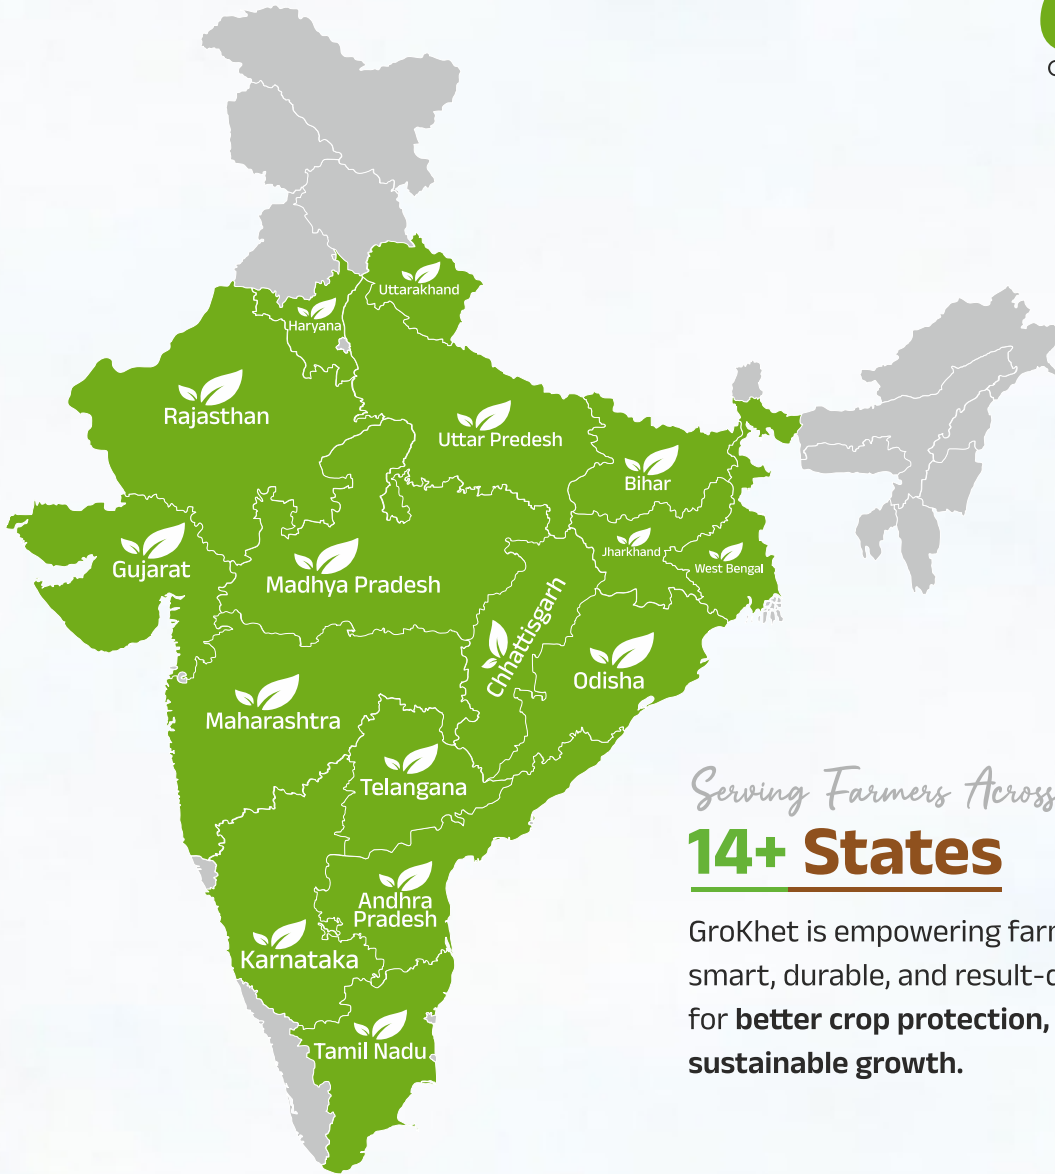

**Improves** **cattle** **health** and **comfort**

Better **comfort** +  
better **hygiene** =  
better **dairy output**

*Serving Farmers Across*  
**14+ States**

GroKhet is empowering farmers across India with smart, durable, and result-driven agricultural solutions for **better crop protection, higher productivity, and sustainable growth.**
